Student Learning Objectives (Course)

Using the Bloom's Taxonomy card, generate and write down one (1) Student Learning Objective for one (1) course.

Evidence?

How will your students show that they have achieved the objective?

Channeling your imagination through your pen/cil, write down one way that students can present evidence of their achievement with regard to this learning objective. If you are stuck, use the Bloom's Taxonomy card and review assessment strategies for your key objective word.

Assignments and Learning Activities

Imagine a Learning Activity that will move students toward achievement of the objective.

Using the Transparent Assignment Design Template, design an assignment or learning activity that your students will do and that will move them closer to achieving your learning objective.
