

A tool for grading paper-based, digital, and code assignments in half the time.

Instructors, have you...

- manually graded multiple-choice and short-answer questions?
- found yourself giving the same feedback to multiple students?
- wished there was a simpler way for students to get their feedback?
- graded in a team (e.g., with a teaching assistant or another instructor)?
- worried that you were not grading consistently across students?
- used Scantron forms in the past and wondered if there is now an alternative?
- felt like you dedicate a lot of time to grading?

Gradescope may be for you!

- Grade by question, grade as a team, and/or use anonymous grading.
- Grade multiple students' work at once with suggested answer groupings.
- Maintain consistency with a flexible rubric and apply rubric changes you want to make to previously graded work.
- Use LaTeX for mathematical notations and Markdown syntax in rubrics to insert images, clickable links, and other formatting.
- Develop a library of frequently given feedback to apply to student work.
- Access annotation tools to mark directly on student work.
- Scan and score bubble sheet exams on your own.

Assignments

Scan Student Work

Students upload PDFs or photos of their work. We support variable-length assignments.

Grade Submission

Give detailed feedback while maintaining consistency with a flexible rubric.

Code

Students Upload Code

Easily manage code submission. Students can submit from Github and Bitbucket.

Grade Submission

Provide immediate feedback with autograder. You can also manually grade code with inline comments.

Exams

Scan Student Work

Saves time overall, prevents cheating, and frees your office of old exams.

Grade Submission

Give detailed feedback while maintaining consistency with a flexible rubric.

Bubble Sheet Exams and Quizzes

Create Your Answer Key

Set point values and partial credit options for each question, adjust later as needed.

Scan Bubble Sheets

Batch student bubble sheets and Gradescope automatically separates them by test version.

Gradescope is available to all Syracuse University instructors and integrated with Blackboard. It supports variable-length assignments (problem sets and projects) and fixed-template assignments (worksheets, quizzes, bubble sheets, and exams). Assignment and question statistics can be viewed to get a clear picture of how students are doing.

At Syracuse University, Gradescope is used by instructors in courses of all sizes, from 4 to 551 students!

Access

Gradescope is integrated with Blackboard so you and your students won't need to create or use a separate Gradescope password because you will be authenticated via your Syracuse University credentials. With the Gradescope-Blackboard connection, your courses will be linked and rosters synced. You then set up your assignment or assessment, grade submissions, and post grades.

- **Blackboard Ultra View:** From your course page, click "Books and Tools" and select "Gradescope Course."

An alternate method is going to gradescope.com/saml and selecting Syracuse University from the list of institutions to sign in with your Syracuse University credentials. This alternative requires you to manually add your course detail and upload the student roster.

Learn More

Visit the [IE Gradescope webpage](#) for information and resources, including links to workshop recordings.

The IE Gradescope team can visit a faculty meeting to share more about the platform, including types of assignments, features, and functionalities, with faculty. Contact Gradescope@syr.edu to schedule.

For Assistance

Technical support questions about Gradescope can be directed to help@gradescope.com.

Contact [Institutional Effectiveness](#) for on-campus Gradescope general support and inquiries.

What Syracuse University faculty are saying...

"Ability to reuse common comments, adjust rubric scores while grading, more confident in consistency, scanned exams means graders can finish grading at home/on own time, not restricted to group grading where paper exams are present, AI aided grouping of responses saves time."

"Ease of use, I can scan the bubble sheets in and get the results scored within 30 minutes for a 200+ person course. It is easy to create the key, edit the key if needed, scores are automatically updated, and the item analysis is also automatically available. The students also appreciate being able to see a copy of their bubble sheet."

"I like the flexibility to perform all aspects of deploying and grading a test using Gradescope."

"I love it! It helps me grade more consistently and quickly. I really like how the students can view all of their exams/quizzes in one place."

"Love grading by question and the ability to apply a consistent rubric easily. Making adjustments to question grading for all students. Saves me a TON of time and I now can get grading done same day or next day instead of days/weeks. Love it overall!"
